## Comments

(Set forth by above question #, if applicable.
Use "Additional Comments" Sheet, if needed)

File #:	95-277908					
#1: With r	nicroscopic hair	comparison, one cannot	determine	from the notes t	that the examin	ation was conducted
in an appr	opriate manner.			<del>-</del> -		
#2: Docum	nentation is poor	The notes are not dated	i, are in pe	ncil and not ink	and abbreviation	ons are used that are
difficult to	interpret. The to	echnician's notes do not o	document	the recovery of l	nair from the Q	items. Some of the
recovered	hair are marked	"NSFC" (presumably No	ot Suitable	For Comparison	n) with no doca	imented reason why
they are no	ot suitable.					
It appears	that a second qu	alified (?) hair examiner	verified th	te hair comparise	on stated in the	lab report.
